## Languages

### Hindi

### English

### Maithali

Dynamic, results-driven Full Stack Developer with a passion for building visually appealing, user-friendly websites and developing scalable, efficient APIs. Proficient in frontend technologies (HTML, CSS, JavaScript, React) and backend frameworks (Node.js, Express, SQL, MongoDB), with a strong focus on delivering seamless user experiences and robust, scalable functionality. Seeking a role as a Full Stack Web Developer to leverage my technical expertise, problem-solving skills, and passion for creating high-quality web solutions while continuously learning and growing professionally.

## Experience

**SLASHASH TECH LLP** **Sep-2023 - Present**  
FULL STACK WEB DEVELOPER  
 <https://slashash.co>

- Led the development of dynamic, responsive web applications using HTML, CSS, JavaScript, Bootstrap, Node.js, Flask, PostgreSQL, and MySQL.
- Designed and implemented multiple user interfaces, ensuring responsive layouts and cross-device compatibility for optimal user experience.
- Improved development workflows and enforced coding best practices to accelerate delivery timelines and maintain high code quality.
- Collaborated with cross-functional teams for effective project planning, UI/UX alignment, and smooth execution of deliverables.
- Integrated third-party APIs to expand application features and functionality.
- Researched and adopted new technologies, contributing to team innovation and development efficiency.
- Optimized complex database views, boosting query performance by approximately 72%, leading to faster and more efficient data retrieval.
- Proactively contributed to performance tuning, scalability enhancements, and system reliability improvements.

**AlmaBetter** **Nov 2022 - Aug 2023**  
Web Development Trainee  
 <https://grow.almabetter.com/>

- Gained hands-on experience in front-end technologies like HTML, CSS, JavaScript, and back-end tools like Node.js, MongoDB, and SQL.
- Developed an optimized web application using ReactJS (front-end) and ExpressJS (back-end).
- Learned and applied best practices such as user authentication and data encryption for high-quality, secure web applications.
- Ranked in the top 5% of a cohort of over 200+ students.

## Projects

**World of Dev Tools** **July-2024 - present**  
 <https://worldofdevtool.world/>

- Developed a comprehensive suite of development tools to enhance productivity and streamline the development process.
- Tools designed to simplify workflows for developers, improving efficiency across various tasks.
- Available for use by developers to improve project management and coding processes.

React, Bootstrap, Monaco Editor, Render, Node, Exprss, SQL

**Reserve Bus-booking Web App**  
AlmaBetter Verified Project

- Implemented Agile methodology to design and develop a bus ticketing platform with ReactJS, Tailwind, and React-Redux for the frontend, and Node.js, MongoDB, and Stripe for the backend.
- Enabled users to search, book, and manage tickets, and achieved a 30% reduction in project time complexity through effective input validation and comprehensive testing.

React, Redux, Node.js, MongoDB, Strip

**Resume Builder** **Mar 2023 - Apr 2023**  
AlmaBetter Verified Project

- Developed a user-friendly resume builder web application featuring a dashboard with various resume templates for users to select and customize.
- Utilized ReactJS and Material UI for UI implementation, Redux for state management, and JSpdf for generating downloadable PDF resumes.
- Hosted the application using GitHub Pages (Gh-Page).

React, Redux, Gh-Page

**Book Your Show** **May 2023 - Jun 2023**  
AlmaBetter Verified Project

- Developed a user-friendly movie ticket booking and management platform using Node.js and Express.js for API creation, MongoDB for data storage, and React.js with Context API for UI and state management.
- Implemented GET and POST API endpoints for data retrieval and submission.
- Hosted the application on Render.

Node.js, React, Contaxt API, MongoDB, Express, Render
