

Anish kumar Thakur

Full Stack Developer

 Jodhpur, Rajasthan, India  7992470122  ak804670@gmail.com  Portfolio website

 LinkedIn  Github

Professional Summary

Full Stack Developer with 2.4+ years of experience in developing scalable web applications and APIs using **React, Node.js, Express, and Flask**. Strong background in database design and optimization with **PostgreSQL, ClickHouse, MySQL, MongoDB, and Supabase**. Implemented secure RBAC systems, global-ready features (multi-timezone and multilingual), AI-powered **Retrieval-Augmented Generation** (RAG) pipelines, and real-time communication platforms. Focused on performance, scalability, and clean architecture.Skilled in deploying and maintaining backend systems using **Docker, CI/CD** pipelines through **Github Actions**, and cloud services.

Experience

SLASHASH TECH LLP
FULL STACK WEB DEVELOPER
Jodhpur(Raj.)
Sep-2023 - Present

- Optimized database queries, achieving up to 72% improvement in query performance.
- Integrated role-based system authorization to enhance application security and access control.
- Migrated the entire asynchronous processing system from Bull Queue to AWS SQS, covering multiple queue types beyond messaging, improving scalability, reliability, and cloud-native alignment.
- Implemented system support for multiple time zones, ensuring seamless global usability.
- Developed and managed multiple socket-based chatting systems for real-time communication.
- Configured localization for the system to support multiple languages and regional requirements.
- Created AI-powered tools for an appointment booking system, enabling efficient scheduling via chat interfaces.
- Collaborated on project management and issue resolution to ensure smooth execution.
- Continuously embraced learning to stay updated with emerging technologies and deliver innovative solutions that enhance team capabilities.

Projects

AI Retrieval-Augmented Generation (RAG) System
an AI RAG for text documents which can reply accordingly
July 2025

- Developed an AI-powered RAG system for text documents using Google Embedding Model, langchain ,Supabase, and Node.js.
- Enabled intelligent, context-aware query responses with high accuracy.
- Designed scalable architecture to handle large document datasets efficiently.
- Implemented multilingual query support for diverse language processing.
- Optimized system for low-latency response delivery and seamless user experience.
- Configured Supabase for vector storage and efficient query performance.
- Built Node.js backend to manage API requests and RAG pipeline integration.
- Conducted rigorous testing to ensure system accuracy and reliability.
- Enhanced system with AI/NLP advancements for improved functionality.
- Achieved precise document retrieval using semantic embeddings.
- Strengthened expertise in AI, NLP, and backend development through project execution.

Google Embedding Model, Supabase, Node.js, langchain, OpenAI, OpenRouter

World of Dev Tools
July-2024 - present

- Developed a comprehensive suite of development tools to enhance productivity and streamline the development process.
- Tools designed to simplify workflows for developers, improving efficiency across various tasks.
- Available for use by developers to improve project management and coding processes.

React, Bootstrap, Monaco Editor, Render, Node, SQL, ExpressJS

Education

Kolhan University, Jharkhand
Bachelor of Commerce
2016 - 2019
 Certificate Link

Skills

Databases

PostgreSQL, MySQL, MongoDB, Redis, Clickhouse

Languages & Frameworks

HTML, CSS, JavaScript, SQL, ReactJS, NodeJS, ExpressJS, Langchain

Platform

VS Code, Render, Gh-Page, Netlify, Postman, AWS

Additional Skills

MERN, SEO, DSA, Business Communication, Testing, Responsive UI/UX, Context API, Redux

Certifications

Full Stack Web Development Course Certificate
